

## Building paths to lifelong learning

*Study Island's high impact, high value standards mastery and test preparation programs are specifically designed to help students master the content specified in state and Common Core standards. Study Island provides rigorous content that is highly customized to these standards, and enables students to improve their performance in core skill areas with a focus on math, reading/English language arts, science, and social studies.*

### What it is

- Standards mastery and test preparation built specifically from state and Common Core standards
- Interactive lessons and activities that reinforce and reward learning achievement
- Real-time progress monitoring that identifies student strengths and areas needing improvement

### Why it works

Study Island ensures that students receive quality academic support and practice.

- Built-in remediation allows for differentiated instruction to help raise individual student achievement
- Students receive immediate feedback, question explanations, and all practice sessions are scored in real-time
- Educators can build and schedule custom diagnostic, formative, and summative assessments
- Teachers receive actionable, real-time assessment reports
- Teacher support tools include a teacher toolkit with lesson plans, instructional videos, and web- and print-resources

Study Island has been very easy to navigate as the administrator, and Study Island's phenomenal customer support staff has always been there to answer any questions we have.

## Ultimate customization

Study Island is leading the way in customizing content to state and Common Core standards. Study Island's in-house content development team, led by former educators and subject matter experts, has developed meaningful content built specifically from each state's individual standards. The program's flexible design enables teachers to easily individualize their instruction and customize the student experience.

## Real-time reporting and differentiated instruction

Study Island records statistics for each student's session in a real-time report card that can be customized by student, subject, class, grade, and school. Private access is given to teachers and administrators to monitor usage statistics and results online. Real-time reports allow teachers to measure progress, and identify areas in which students are excelling or need extra practice related to state and Common Core standards; giving them the ability to differentiate their instruction and promptly respond with the appropriate intervention.

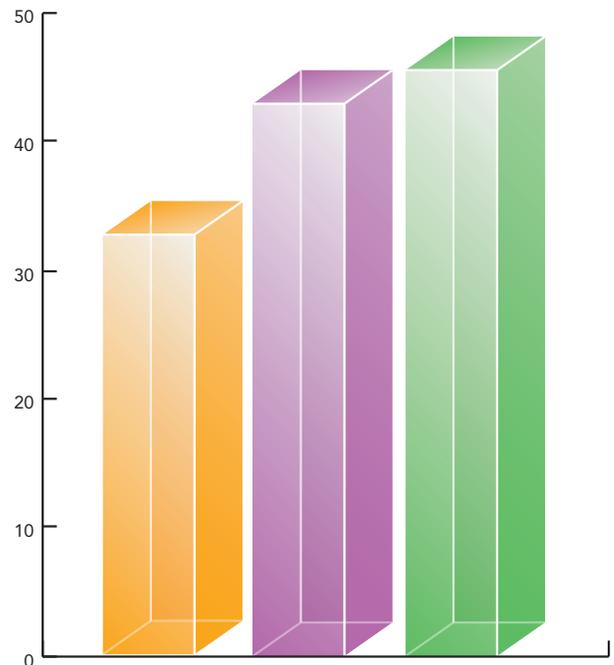

## Self-paced or teacher-guided instruction

Study Island is ideal for both self-paced, individualized learning or teacher-led, whole-class instruction. Teachers can easily guide students through the program, customize instruction based on student needs, communicate expectations, and create assignments. Students can work through questions using a standard test format, an interactive game format, printable worksheets, or a classroom response system; and the brief lessons, animations, and activities keep students alert and engaged.
