

10 FREE resources for educators

Mobile technology to fit your needs

Mobile learning is a growing trend in classrooms, creating a more flexible, collaborative, and interactive learning experience in schools and districts. Mobile devices are changing the way that educators teach and students process information, and they have become an assumed part of the education equation. Tablets, smartphones, and other mobile devices are being implemented in classrooms and entire school districts more than ever. Students are demanding mobile technology integration, and there is great potential for how mobile devices and learning solutions can enhance your instruction.

Rigorous test preparation and standards mastery

- Mobile-optimized standards mastery and test preparation programs built specifically from state and Common Core standards
- Readily available reporting, class management, and content from any mobile device that can easily fit into your school's or district's existing mobile-initiatives
- Dynamic mobile games and interactive content that keeps your students engaged in their learning
- Real-time progress monitoring that quickly identifies student strengths and areas needing improvement
