

Connect teaching & learning with
EDUCATIONCITY

Drive instruction and targeted student practice

EducationCity connects teaching and learning by pairing time-saving teacher tools with standards-aligned* student activities. Colorful animation and interactive resources bring learning to life in this engaging, online program, enabling educators to personalize learning for whole classes, small groups, and individual students. Trusted and used by over 40,000 teachers, EducationCity provides educational content for pre-K through 6th grade language arts, math, science, computing, matemáticas, and English as a second language.

Explore

Interactive, research-based lessons and activities for topic introduction and reinforcement.

Teach

Teaching resources developed by teachers, for teachers, for whole-class, small group, or individual instruction.

Learn

A variety of activities designed to inspire creative thinking and build skills for all types of learners.

Monitor

Easy-to-use, real-time reports to track student progress and mastery of topics or standards.

Discover EducationCity's interactive resources

EducationCity offers a variety of teaching resources and activities organized by subject, grade, standard, and lesson objective to make lesson planning easier than ever before.

Standards Map

Use the Standards Map to easily locate content and assign activities aligned to lesson objectives.

Topic Tools

Interactive whiteboard activities including virtual manipulatives provide an ideal tool for topic introduction and reinforcement.

Activities

Engaging activities provide practice to reinforce concepts for group or individual learning. Activities also include lesson ideas, teacher notes, and printable activity sheets.

Learn Screens

Animated video tutorials or mini lessons provide an in-depth look at specific topics.

MyCity

Quickly select, sequence, and assign EducationCity content for whole classes, groups, or individual students.

ThinkIts

Open-ended questions designed to encourage higher-order thinking skills and provide cross-curricular, whole-class collaboration.

PlayLive

Interactive math and spelling games allow players to challenge other students in a safe, competitive environment.

SuccessTracker

Monitor the progress of individual students or whole classes in real time with easy-to-use reporting features.
