Have you seen Study Island lately?

Study Island is committed to providing easy-to-use practice and classroom assessments using rigorous, high-quality content that is aligned specifically to your state standards. Now, we’ve taken the Study Island you know and love to the next level! We’re excited to announce changes to both educator and student features—and it’s all based on YOUR feedback.

The latest enhancements will:

- **SIMPLIFY** the structure and scoring of practice sessions
- **INCREASE** student engagement and ownership of learning
- **IMPROVE** workflows and streamline your user experience
Ensure success for every student

Support student agency
To create a more personalized student experience, we’ve built a new learner dashboard that puts greater academic ownership in your students’ hands.

- To inspire engagement, students can monitor how many Blue Ribbons they have earned.
- In-progress topics are displayed to ensure that learners can quickly get back to work.
- The suggested topics area offers recommendations for topics where a second attempt at mastery is needed.
- When class assignments are created by a teacher, they will appear in this area for students to quickly select.

Improved practice experience
Study Island practice sessions focus on elevating student engagement and remove barriers regularly experienced in online testing environments.

- Ending a session before it is complete pauses students’ current progress. All practice sessions will always be 10 questions in length.
- Many questions appear in a simple side-by-side format to improve viewing.
- Taco the Crab scuttles across the screen to provide encouragement as students answer questions.

TIP
Use practice sessions to prepare for rigorous summative assessments or throughout the school year for ongoing standards mastery.
Simplify practice and preparation

Highlight meaningful metrics

Research shows that students are more successful when they track their own learning. Based on your feedback and the evolution of how you use Study Island today, we’ve surfaced something even more meaningful—best score and total number of attempts.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Session 1 – 3/10 Questions Correct</th>
<th>Session 2 – 6/10 Questions Correct</th>
<th>Session 3 – 9/10 Questions Correct</th>
</tr>
</thead>
<tbody>
<tr>
<td>4th</td>
<td>30%</td>
<td>60%</td>
<td>90%</td>
</tr>
</tbody>
</table>

60% Cumulative Score
Cumulative scoring is still available in the educator view to provide a more comprehensive picture of performance.

90% Best Score
The highest score from all session attempts is prominently displayed for students.

3 Number of Attempts
Students can select their number of attempts to view practice history and individual session scores.

Spotlight standards alignment

In Study Island, content is built from the ground up to your state standards. To help you easily identify how each topic is aligned, we’ve put a spotlight on standards and improved navigation to all practice options.

- Select the Standards Map button to view a complete correlation of state standards to Study Island Topics.
- View the specific standard(s) that each piece of content is built to support, and click to read standard details.
- Lessons appear alongside practice to help encourage students to begin with instruction.
- Select a topic to see all content options available in an easy-to-read, pop-up box.
Enrich collaborative learning

Are you using Study Island Group Sessions as a formative assessment tool? Enhancements to this collaborative practice feature improve how you create, assign, and launch Group Sessions.

- Group Sessions are now available as an assignment type in Class Manager, in addition to their location in the Topic Tree.
- Select a previously created Built Test from your library to use in a Group Session.
- Make more room for the question to display by collapsing a new tab that shows which students have answered and those who still need to.
- Keep tabs on performance as you go without revealing individual student performance.

Launch Built Tests through Group Sessions as a collaborative review after test day or to preview questions that students may experience on summative exams.

Integrate learning with NWEA

Study Island has partnered with the Northwest Evaluation Association (NWEA™) to extend our fully integrated solution into the Measures of Academic Progress (MAP®) for Science assessments for use with the Next Generation Science Standards (NGSS). Results from the assessments are used to create an individualized learning path of Study Island topics unique to each student’s needs across grades 3–8.
