

TRACK progress and guide instruction

Comprehensive assessment solutions to individualize learning for students

Edmentum™ Test Packs provide an evaluation of your students' progress and prescribe rigorous curriculum to fill learning gaps and personalize instruction for individual students or an entire class. Edmentum Test Packs automatically prescribe assignments, or teachers can make manual adjustments before assigning lessons. Consistent alignment between test items and our rigorous curriculum assures that each learner receives an individual learning path.

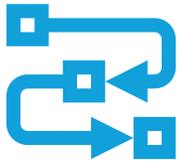

With Edmentum Test Packs, you can:

- Access valuable information about the academic progress of individual students, classrooms, schools, and districts based on state and national standards at a given period of time
- Guide and inform instruction through targeted, individualized learning paths
- Track and evaluate students' progress from one test to the next
- Pinpoint student knowledge gaps and identifies which students need additional instruction
- Differentiate instruction through the automatic learning paths based on areas of need

Meet all students where they are to move learning forward

Edmentum™ Test Packs assess individual areas of need and target instruction through rigorous assessments; targeted prescriptions; engaging, media-rich content; and real-time progress monitoring.

Automatic learning paths and instructional content

Instructional modules from Plato Courseware are prescribed when students fail to demonstrate proficiency. Our online instructional content provides dynamic, digital content that integrates interactive, media-rich resources. Students work through their prescriptions and are tested again using a comparable test with the same testing categories.

Real-time progress monitoring

Ongoing monitoring of student performance and progress is important to ensure student success and to make sound instructional adjustments as needed. Edmentum Test Packs include a variety of built-in instruction and assessment reports to track progress and monitor performance. Using the comparable test versions, students can be retested against the same standards to benchmark progress.

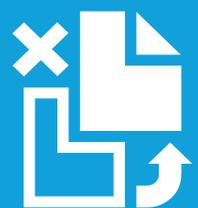

Technology-enhanced item types

Edmentum Test Packs include a wide variety of technology-enhanced item types designed to promote higher-order thinking and inquiry. Our technology-enhanced item types ensure that each question is written to the appropriate difficulty and depth of knowledge (DOK) levels and give students exposure to the appropriate content.

Flexible assessment solutions

Edmentum Test Packs are fixed, comparable assessments that support learners in working toward mastering grade-level skills and that seamlessly track progress from one assessment to the next. Educators can administer four easy-to-use assessments per subject for each grade level to easily track progress over time.
