

# ACHIEVE

success with proven,  
data-driven solutions

## Engaging Online Practice for Student Success

Edmentum's Study Island is a customizable K–12 assessment and practice solution built specifically from the California Content Standards and Common Core Standards. Study Island's high-impact, high-value learning programs provide proven academic support through practice, immediate feedback, and built-in remediation to improve students' performance in core skill areas. Paired with an intuitive, real-time data dashboard, you can easily track student progress and differentiate instruction to continually drive student achievement.

**Did you know** that because Study Island is built from California's Common Core State Standards, it also supports California's English Language Development (ELD) Standards. Contact us today for more information!

## Our practice and assessment solution:

- Ensures that students receive quality academic support and practice aligned to California standards
- Provides students with immediate feedback and question explanations
- Differentiates instruction with built-in remediation tools to raise individual student achievement
- Helps prepare students for more rigorous and interactive Web-based exams
- Allows you to customize instruction based on student needs, communicate expectations, and create assignments

# Why Study Island works

With immediate feedback and question explanations, Study Island keeps students motivated to learn at their own pace. Teachers are able to differentiate instruction to meet the needs of each student with built-in remediation tools to raise individual student achievement.

## Interactive lessons and activities

Reinforce and reward learning achievement with interactive lessons and activities. Whether you would like to offer students structured independent practice or you are looking for ways to engage large or small groups, Study Island includes a collection of engaging session types.

## Actionable student data

Our detailed reports provide valuable data on school activity and progress, overall student performance, and disaggregated benchmark scores. Plus, our teacher dashboard, Edmentum Sensei, offers data-rich analytics, with charts, graphs, and visual cues so that you can easily track your students' progress and take action in real time.

## Technology-enhanced item types

Study Island has thousands of questions featuring a variety of technology-enhanced item types, including constructed response, sequence, and hot spot. These rigorous assessment questions are designed to promote higher-order thinking and inquiry while preparing students for more rigorous and interactive Web-based exams.

## Self-paced or teacher-guided instruction

Students and teachers can choose their own styles of teaching and learning. Students can work through questions using a standard test format, interactive game format, printable worksheets, or a classroom response system. Alternatively, teachers can guide students through the program, customize instruction based on student needs, and create assignments.
