

# CLASSROOM ASSESSMENTS

that inform instruction

## Classroom assessment solutions that turn data into action

Assessment *for* learning rather than assessment *of* learning is at the heart of what classroom assessment strategies are all about. Determining where learning breaks down and intervening over time are essential elements of the instructional process.

Edmentum provides targeted, standards-based practice and assessment solutions for the classroom. We offer educators high-quality data that help them identify what students know and where learning breaks down throughout the school year. We are committed to making accessing, analyzing, and taking action on your data easy.

## Our integrated solutions provide:

- Standards-based practice and instruction that monitor progress during the learning process
- Actionable results that provide detailed feedback and help you pinpoint academic strengths and weaknesses
- Flexible tools and resources that allow you to differentiate your approach and target individual student needs in a timely manner
- Customizable short- and medium-cycle assessments that allow you to adapt to future needs and build a sustainable strategy

Each student having their own individualized path allows students to receive exactly what they need, without their peers being aware that they are doing different work.

—Lee Mierow, Principal,  
Wrightstown Middle School, WI

# Classroom assessment strategies to meet your unique goals

## Monitor progress over time

Show growth by tracking progress data over a sustained period of time to identify strengths, weaknesses, and provide explicit feedback about student progress during the entire instructional term.

## Visualize progress across a unit or term

Utilize periodic assessments to monitor student attainment of larger concepts with the goal of intervening and reteaching where appropriate.

## Assess for understanding between instructional units

Leverage comparative interim assessments that can adapt to future needs and build sustainable, short- and long-term assessment strategies.

## Administer weekly progress checks

Impact students in the moment with short progress checks to differentiate instruction and measure concept mastery.

## Conduct informal daily check-ins

Make continuous instructional adjustment over time based on real-time student progress.

*Our program is successful for two reasons: content and people. Edmentum provides standards-based courses which include both formative and summative assessments. Our staff utilizes the data from the formative assessments to help students 'learn how to learn' with the online content.*

—Janie Ulmer, Director, La Porte Community School Corporation, IN
