

Integrate

Edmentum programs
with SAM Spectra

Automatic data synchronization with your student information system (SIS) is an important component to ensuring a seamless implementation. That's why Edmentum is now partnering with Mississippi's leading student information manager, SAM Spectra. This partnership will begin its integration with Edmentum Courseware, and will be expanding to other Edmentum products in the future.

Use this integration to automate these classroom tasks in Edmentum Courseware:

Create New Users

Add user information (name, password, grade, email, etc.)

Update Existing Users

Set users to active/inactive and edit user information

Roster Sections

Create classes based on schedule and enroll students

Deactivate Existing Users

Users who leave district will be deactivated and users returning will be reactivated

Classroom Impact

- Automate time-consuming data entry and administration tasks
- Ensure accuracy of student data for consistent, meaningful record-keeping
- Overcome login credential confusion with single sign-on (SSO)
- Automatically transfer course grades over to SAM Spectra
- Keep the classroom focused on teaching and learning
