

# BASE Education

## 1-12 online SEL assessment and curriculum

Edmentum believes in the promise and potential of supporting the whole learner. As part of that belief, we proudly partner with CASEL-designated BASE Education to offer social-emotional learning (SEL) assessment and curriculum rooted in mental health and wellness principles and underscored by clinical research. As students regulate emotions and behaviors, develop relationship skills and social awareness, and practice critical decision-making to plan for their futures, BASE Education and social-emotional learning serve as powerful tools at the heart of that work.

**Assess and instruct with one program** that identifies SEL strengths and needs and delivers 100+ courses

**Impact social-emotional skills for all** and intervene with students who are most at risk

**Support a range of SEL implementations** with self-directed student curriculum, teacher-guided direct instruction, and family learning access

**Navigate impacts of a changing world** with evidence-based curriculum that creates a safe space for mental health and wellness education

BASE Education is **CASEL-designated** (the Collaborative for Academic, Social, and Emotional Learning) and thereby recognized by the leading organization behind SEL research for being well-designed and evidence-based.

# Support the Whole Learner with BASE Education

Did you know that students who receive SEL instruction perform better academically than their peers? Supporting the development of these skills can help increase engagement, build connections, and remedy behavioral challenges. In every BASE Education course, students are given the opportunity to define and reflect on their values, knowledge, and behavior as aligned to the topic being explored; learn coping strategies and dispel barriers to success; and set plans in place for forward thinking using a strengths-based approach.

## Nonacademic Course Design

Minimal text, calming design, and vivid imagery tap into the emotional center of the brain.

## Flexibility & Built-In Tools

Courses are offered in more than 50 languages, with text-to-speech, vocabulary tools, and educator guides.

## Parent/Guardian Portal

Companion courses provide parents, families, and caregivers language and insights to connect with their student.

## Progress Monitoring

Course progress and student responses are captured, including potentially harmful Firewords™, to inform intervention.

BASE is a social-emotional, Web-based program that is saving lives, changing behaviors, and creating honest relationships between adults and hard-to-reach teens.
