

PREPARE STUDENTS

for College and Career with CTE

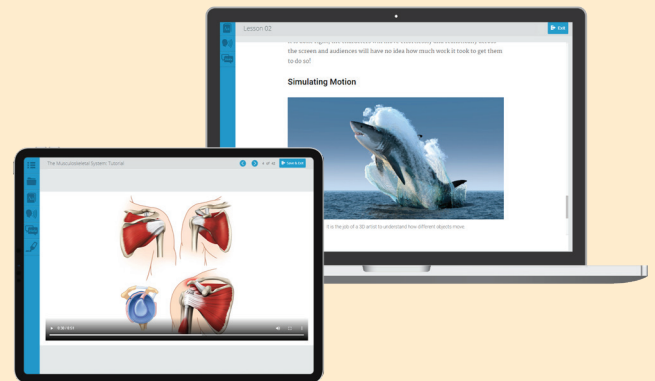

Career & Technical Education Pathways

When students can connect what they are learning to the real world, attention and engagement improve significantly. Career and Technical Education (CTE) provides that connection and allows each student to personalize their high school education to their interests and career aspirations. Edmentum offers a wide range of CTE courses that span 28 career pathways across 12 career clusters through our partnership with eDynamic Learning.

Our highly interactive CTE courses engage learners and give them the opportunity to experience subjects that complement their core curriculum.

Help your students take their next steps and ensure future success by:

- Expanding student choice with a variety of course offerings
- Preparing students for in-demand careers in fields including information technology (IT), health science, hospitality & tourism, and more
- Offering comprehensive practice aligned to CompTIA, NNAAP, and ServSafe® professional certification exams
- Empowering career exploration for students as young as middle school

Students who concentrate in CTE in high school are more likely to graduate high school on time, enroll in postsecondary education, and to be employed full time eight years post-graduation.

(U.S. Department of Education, 2019)
