

NEW Learner Experience

New K–2 and 3–5 Learner Experiences

Best-in-class, age-appropriate learner experiences for your students

Edmentum’s new learner experiences for K–2 and 3–5 learners make our award-winning courses and assessments easier for elementary learners to use than ever before. These interfaces are designed with 21st century learning standards and user feedback, creating an online environment for learners to thrive from anywhere there’s Internet connectivity.

Students will maintain access to all of their assignments and features through this new mobile-optimized learner interface that’s designed to be engaging and intuitive for younger learners. At this time, students in grades 6–adult will keep the current learner interface.

K–2 Interface

Home Page

The simplified home page is ideal for young learners, with fewer options to access assignments.

Access all Courseware Assignments, Flex Assignments, and Learning Paths generated by Accuaccess and Test Packs.

Access Test Packs and Accuaccess Assessments (learners who do not use Edmentum Assessments will not see this area).

3–5 Interface

My Assignments

Notes and Collaboration areas are accessible from here as well as the My Portfolio report.

The navigation menu makes it easy to move to different areas of the interface.
